Yo Bro

Practise the word list from school

An app for iPhone, iPad and Android that turns the word list from school into a few minutes of practice a day.

- **Scan the list from school**
  Take a photo, and Yo Bro reads the words on your phone.
- **A few minutes a day**
  The Today card brings back the words that are due. Set the date of the test, and those words come first.
- **Eight ways to practise**
  Test, practice test, multiple choice, learn, spelling, hints, dictation and flashcards.
- **Reading, verbs and language rules**
  A course for children starting to read, verbs in every tense, and rules such as there, their and they're.
- **Maths, free**
  Fractions, percentages, negative numbers, algebra and more: watch an example first, set your answer on number wheels, and get a second go.
- **Battle with your class**
  Same room, same Wi-Fi. Animals instead of names.

How to start

1. Install Yo Bro
2. Photograph your word list
3. Practise a few minutes a day

Yo Bro in your class

In class, in four steps

1. **Pupils install Yo Bro** on their own phone or tablet.
2. **Share the list:** pupils photograph it, or scan the QR code on a sheet you print from Yo Bro. No accounts, no internet.
3. **A few minutes a day** with the Today card.
4. **End a lesson with a battle:** one device hosts, and up to 32 players join by QR code. Try your network first: many school networks keep devices apart.

Why it helps

- Spread out: words come back after 1 day, 3 days, a week, a fortnight and five weeks; the next test's words come first.
- Eight ways to practise, a font for children with dyslexia, words read aloud.
- Verbs, language rules and vocabulary, and a reading course for the youngest.
- Maths is free for every pupil: six learning paths, thirty-three chapters, an example first and hints that give the next step, not the answer.

Privacy

- No pupil accounts, class lists or chat.
- No advertising, no tracking.
- Lists and scores stay on the pupil's device.
- We receive no pupil data.

What it costs Free to download: three lists, three ways of practising, the first level of every sum, three sets of pictures, the whole reading course, the first lessons of verbs, language rules and vocabulary — and the whole of maths. A subscription, by the year or by the month, unlocks the rest, hosting a battle included; it renews automatically until cancelled. No school licence. Joining a battle is always free.

Try it with your class
